Southern Wind's new cruiser/racer SW-RP90 hits the Med after delivery from Cape Town

Of all the brand new sailing yachts cruising the Mediterranean this summer, few will have as many miles under their keels as the SW-RP90. Recently delivered from Cape Town to Gibraltar via the Ascension Islands, the 27.5m custom sloop was created by Southern Wind, with interior design by Nauta Design and naval architecture, exterior and interior arrangement courtesy of Reichel/Pugh. A smooth, ergonomic deck design means that *Allsmoke* can be comfortably sailed in cruising mode with the minimum of crew. The owner was also keen that she be easily converted to racing mode, so we could very well be looking at a future regatta contender. [sws-yachts.com](http://sws-yachts.com)
